EXHIBITION OVERVIEW

Fahrenheit 2024 presents 100 pieces selected by juror Kathy King from more than 500 submissions from artists from across the United States. The selected pieces range from traditional vessel forms to large-scale installations.

The *Fahrenheit 2024* Best of Show, selected by King, is awarded to Carly Slade for “Berta.” Slade will receive a solo exhibition in the Igal & Diane Silber Vault Gallery at AMOCA in 2025-26.

AMOCA is grateful for the generosity of many individuals, members, and donors who have made our exhibitions possible.

Special thanks to:

JUROR'S STATEMENT

Being invited to serve as the juror for *Fahrenheit 2024* at AMOCA was an honor. I was quickly struck by how immersive and challenging this experience would be. Because of the many exceptional works, I spent weeks reviewing and re-visiting the applications. I ultimately chose works that exhibited a strong concept, a clear sense of materiality, and an understanding of the technical and structural needs of working with our chosen medium of ceramics. Most of all, I was impressed by the depth of honesty and vulnerability shared in the applicants' biographic information and statements.

The variety of perspectives shared gives me hope that through art, we still have a space to share diverse opinions. The work I chose as "Best in Show" spoke to me for its meticulous craftsmanship and because it represented "the in-between" in our country – those overlooked or struggling due to societal or economic constructs and the impermanence of home.

This exhibition shows how the medium of ceramics can mirror our world, from the sculptural to the symbolic, the functional to the figure. Some artists pair other materials with clay, while others use the unique abilities of clay to mimic those other materials. There are established artists in the exhibition whose work I have followed for years and many whom I have the pleasure of being just introduced to, and I am inspired by their innovative ways of pushing the field forward through ideas and techniques.

Thank you to the AMOCA staff and all the artists who submitted work and allowed me to experience and ultimately share the breadth of contemporary ceramics today and the many directions and places this material can take us.
